**THE 7.0 METER  
A EUROPEAN FLAIR  
WITH A DUTCH TOUCH**

The 7.0 meter is a cruising sloop with a very smartly styled trunk cabin. A real family sailer for all kinds of sailing.

**A.** A sheer delight to handle, and you'll love the steadiness under a stiff breeze with her 8 foot beam and 1,300 pounds of ballast. The hull is of heavy hand laid-up fiberglass construction, with balsa end core sandwiched in the decks, resulting in an exceptionally tough deck and hull.

You'll be impressed by the clean uncluttered lines and wide walkways. The molded teak non-skid surfaces and the solid feeling underfoot are typical of S2's superb construction. Bow pulpit and lifelines are provided for your comfort and safety. Lewmar halyards and genoa winches are standard, plus a black toe track that's bolted on with 1/4" stainless steel bolts.

**B.** Black anodized mast is internally rigged and all lines run to the cockpit. Very high quality main and jib sails are standard and the generous freeboard provides exceptional dryness and outstanding sea-handling capabilities.

**C.** Below deck is a remarkably spacious open-planned interior with no obstructive bulkheads. Beautiful laminated Burmese teak truss provides solid support for the mast without a post. The light, airy interior

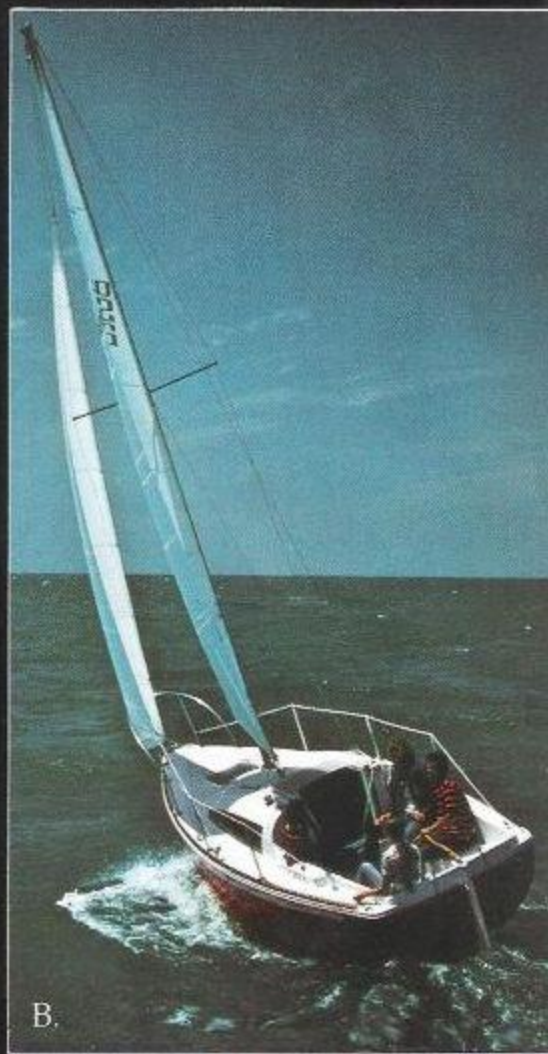

with 5 ft. 4 in. headroom accommodates four adults comfortably. Rich color-coordinated fabrics, teak trim, and enclosed head with privacy curtain create a feeling of elegance afloat.

**D.** Here is a galley with everything within arm's reach. For home-like convenience at sea, you'll appreciate the built-in top loading urethane insulated icebox and optional double burner alcohol stove. The stainless steel sink features a hand pump and a 15 gallon fresh water tank. Spacious working and storage area truly make this galley a nautical chef's delight.

**E.** Stepping into the large cockpit of the 7.0 meter, you'll find room for six; also spacious stowage starboard for the auxiliary fuel tank and portside for stowage of sails. Visibility over the cabin to the bow is outstanding. The 6 ft. 9 in. cockpit area is self-bailing.

**F.** Here's a family sailer you can take with you on vacation, or trailer to far away regattas for some exciting sailing. The launching and retrieving of the 7.0 meter with its long shoal draft keel, or as an option with keel centerboard, make this boat as easy to trailer as it is to sail.

An S2 Yacht is designed to please the most discriminating sailor, to meet his expectations for performance, beauty and comfort in a fine sailing ship. It is handcrafted of superior quality materials, combining first class joinery and up-to-date boatbuilding techniques
